PROFESSIONAL SUMMARY

Aspiring System Administrator and Business Analyst / Project Manager with strong technical skills in Windows Server, Active Directory, and network configuration, plus hands-on expertise with VirtualBox and Cisco Packet Tracer for lab-based system deployment and network simulation. Enterprise background in business analysis and software QA, spanning requirements elicitation, As-Is/To-Be process mapping, functional specification, and end-to-end test execution for production systems, alongside data management in Salesforce CRM and RFID identity systems. Seeking to leverage technical and analytical experience in an enterprise IT environment.

EDUCATION

Mapúa Malayan Colleges Laguna

Cabuyao City, Laguna

Bachelor of Science in Information Technology (Specialization in Cybersecurity)

PROFESSIONAL EXPERIENCE

Gardenia Bakeries (Philippines), Inc.

Biñan City, Laguna

IT Business Analyst / Project Management Intern

Apr 2026 – Aug 2026

- Led requirements elicitation with 5–6 stakeholders to digitize an internal quality-audit process; produced As-Is/To-Be flows in draw.io and authored the Functional Specification Document used as the build baseline.
- Executed 1,184 test cases for a customer conversion project across ~800 retail stores, tracking 11 defects to closure in Jira pre-release.
- Ran 235 test cases for an Android OS upgrade across hundreds of field tablets, surfacing 1 critical blocker pre-rollout.
- Developed a workflow app in AppSheet and Google Sheets, featuring a dynamic approval engine, an immutable audit log, and automated email notifications.
- Configured the digitized workflow in a DMS, owning analysis and build.

Cabuyao City, Laguna

Information Technology Services Office (ITSO) Assistant

Sept 2023 (Contractual)

- Delivered Tier-1 support for RFID identity management systems, ensuring accurate card issuance for 100+ users.

Freelance Services

Remote

Technical Editor & Content Specialist

Nov 2021 – Dec 2025

- Managed digital assets for international clients, ensuring high click-through rates (1M+ views).
- Performed precise technical editing for English-language localization projects.

TECHNICAL PROJECTS

Community-Based Reporting and Response System (Capstone)

Lead Researcher & Developer

- Engineered a cross-platform disaster response system for the Biñan City CDRRMO, writing all three applications: a citizen mobile app for geotagged incident reporting, a responder interface for dispatch acknowledgment and live field updates, and a centralized web administrative portal.
- Built the portal for incident validation, resource dispatching, and geographic analytics, replacing manual workflows.
